Fort Flex

Economical Security Seal with Tear-Off Function

A versatile and effective tagging seal for transporters and retailers, the Fort Flex seal is also suitable for many applications that require tamper-evident securing.

The Fort Flex seal is an ideal security seal for tagging and quick, efficient locking requirements. Its thin and flexible strap is perfect for light security applications such as the tagging of clothes, plants, fire extinguishers, catering/airline trolleys and cable-tie replacements.

Features

- 1 Standard markings for the Fort Flex include serial numbers, customer names and/or logos. The Fort Flex seal can be etched with hot foil colour marketing or permanent laser marking. Laser marking offers the highest level of security as it cannot be removed or replaced.
- 2 The seal is designed with an inclusive tear-off function for easy removal by hand.
- 3 The slim tail allows for easy application for various small sealing requirements, especially for small sizes.
- 4 The strap is designed to prevent accidental reverse-locking.
- 5 The sizeable marking flap caters for logos, text, serial numbers and barcodes.

Technical Specifications

PRODUCT

Product	Material	Locking Length	Strap Diameter	Tensile Strength	Marking Area	Max Marking Digits
